

A CorOffice GATEWAY SERVER offers the latest in security and remote access features allowing you to take full advantage of your IT systems safely from any location.

Many companies have the need for an external connection into their office network. You may want home workers to access your IT systems or connect remote offices together.

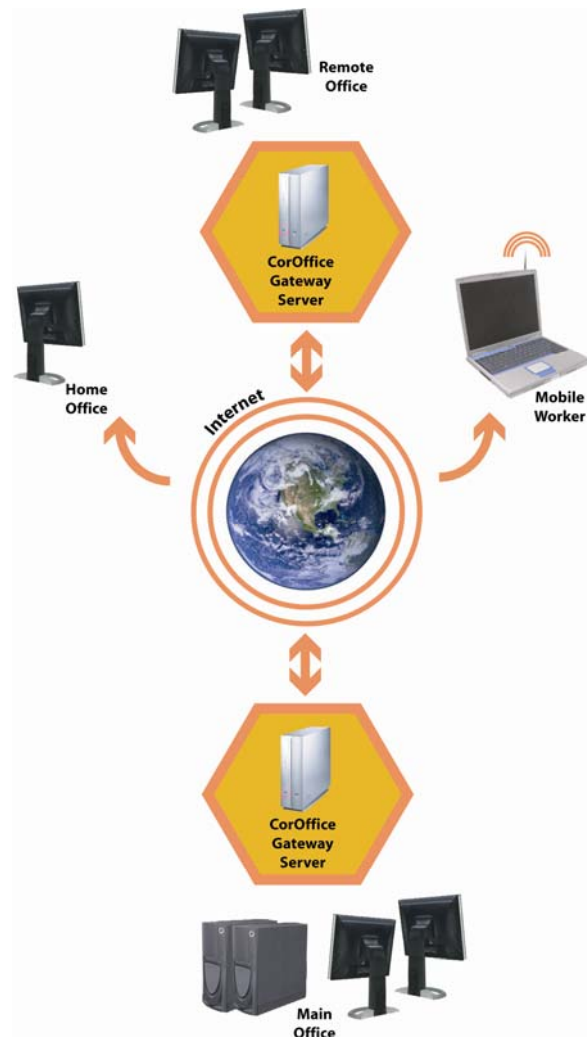

The CorOffice Gateway Server is the secure, reliable and cost-effective solution.

BENEFITS

- Enable remote users to connect securely from any Internet enabled location.
- Securely connect branch offices to head office systems.
- Extremely reliable, allowing many simultaneous connections.
- Unlike other systems, there is no VPN client license requirement.
- Stateful packet inspection firewall.
- Intrusion detection system.
- Intrusion prevention system.
- Web page content filtering helps control distasteful and illegal web content.
- Automatic updates ensure your system has the latest security protection and helps keep hackers out.
- Junk email filtering.

“More individuals within businesses require more access from more locations than ever before”*
